To Whom It May Concern:

In mid 2006, I hired WebAndNet to build my website. To my surprise, I received possibly the world's largest sole-practitioner gastroenterologist website. Filled with accurate content—information for patients, presentation PowerPoint for physicians, videos, endoscopy photos with explanations, and more. Several of my peers have remarked on the excellence of this website.

This website will professionally represent my practice for a long time, and as a bonus, its targeted search engine keywords rank tops in searches. My website traffic increased over 400% without paying for any advertising! I highly recommend WebAndNet's workmanship on websites.

Sincerely yours,

Dr. Atilla Ertan, MD, FACP, MACG, AGAF
